

Tyler VanBlargan

Frontend Developer

tvanblargan@outlook.com

About

Since going to school for Mathematics and Computer Science, Tyler has spent time working with clients building custom web applications (2016-2018) and developing customized business applications (2018- present) to store and analyze data.

Outside of development, Tyler fills his time exploring the world of photography with his dogs and cats as well as playing board games with friends and family.

Portfolio

TerabyteTiger.com

- Built with Nuxt, Deployed on Netlify

Experience

Vue.js & Javascript

- Working with Vue to build internal business applications and personal projects since March 2019.

- Technical Reviewer for Vue 3.0 Cookbook via Packt Publishing

- Reviewing and Approving Pull Request to the Gridsome.org Project

HTML & CSS

- Writing semantic HTML with CSS Styling since 2016.
- Frequently utilizes CSS Grid, Flexbox, and other modern CSS features to recreate interfaces.

Skills

Communication

- Mapping processes via Draw.io.
- Designing wireframe mockups for client review.

Problem Solving

- Able to continually push development skillset to address new problems as they arise.
